Work Experience

Recapeo Limited | Frontend Developer Intern

Dec'23 - Feb'24

- Worked on a project and designed the landing page, with **ReactJS** and **Tailwind CSS**, contributing to approximately **60%** of the project's frontend design. Collaborated with a team of three members.
- Utilized **APIs** for data handling, comprising **30%** of frontend functionality.

Movmi | Full stack Developer Intern

Jun'24 - Aug'24

- Developed Movmi official web application using **Next.js**, contributing **70%** to the **frontend design** using **tailwind shadcn**, **gsap** and **40% to backend functionalities**, including **Google authentication integration**.
- Implemented a **responsive** user interface and **local storage for data management**.

Projects

Expense Tracker Reactjs, Firebase Webapp : [Live](#) [Code](#)

- Users have the ability to monitor their income and expenses.
- Google authentication integrated.
- The application features a basic, responsive user interface and utilizes local storage to store data.

Music School Next Js(UI) Webapp : [Live](#) [Code](#)

- Fully responsive and interactive UI with multiple pages.
- Aceternity UI engages users with animated components.

Github Log (MERN App): [Code](#)

Built with React.js, MongoDB, Express.js, and Passport.js.

- MERN Stack development with GitHub API integration for user authentication, CRUD operations, and seamless error handling.
- Semantic UI for responsive styling, ensuring a smooth user experience with tailwind css.
