Work Experience

Movmi | Web Developer Intern   **Jun'24 - Aug'24**

- Developed Movmi official web application using **Next.js**, contributing **80%** to the **frontend design** using **tailwind shadcn, gsap** and **20% to backend functionalities**, including **Google authentication integration.**
- Implemented a **responsive** user interface and **local storage for data management**.

Recapeo Limited | Frontend Developer Intern   **Dec'23 - Feb'24**

- Worked on a project and designed the landing page, with **ReactJS** and **Tailwind CSS**, contributing to approximately **80%** of the project's frontend design. Collaborated with a team of three members.
- Utilized **APIs** for data handling.

Projects

Expense Tracker Reactjs, Firebase Webapp : Live Code

- Users have the ability to monitor their income and expenses.
- Google authentication integrated.
- The application features a basic, responsive user interface and utilizes local storage to store data.

Music School Next Js(UI) Webapp : Live Code

- Fully responsive and interactive UI with multiple pages.
- Aceternity UI engages users with animated components.

Github Log (MERN App): Code

Built with React.js, MongoDB, Express.js, and Passport.js.
- MERN Stack development with GitHub API integration for user authentication, CRUD operations, and seamless error handling.
- Semantic UI for responsive styling, ensuring a smooth user experience with tailwind css.
